

Barousse

Un'azienda eco sensibile per prodotti ecocompatibili. Tra i valori imprescindibili delle porte Barousse ci sono lunga durata e facile recupero o riciclo, uso di materiali selezionati quali legname proveniente da foreste produttive, pannelli in MDF a bassa emissione di formaldeide, uso razionale delle materie prime per ridurre sprechi e scarti, poi riutilizzati per generare energia, controllo delle emissioni, uso di vernici ecologiche e finiture all'acqua e impianti e processi conformi alla norma ambientale UNI ISO 14001. In foto: *Sahara P linea Etno*, essenza Zebrano Sahara.

An ecosystemic company for eco-friendly products. Environmental protection and absolute respect for human health are the basic principles on which Barousse centres its operating philosophy. The business process management, in compliance with UNI ISO 14001, is based on policies concerning energy saving, renewable energy source choices, careful waste management, production waste limitation and emission control. Barousse has defined ad hoc low environmental impact products throughout the duration of the product, made with timber from sustainable forest management plantations or MDF with low formaldehyde emission and finished with water-based varnishes.
